APRIL 2011

PO BOX 19830  
BROOKLYN PARK, MD 21225

Uncover the car, dust her off, pull her out of the garage and fill her up cause.....

**CRUISING BEGINS APRIL 1ST  
AND WE HAVE MOVED OUR CRUISE LOT  
TO THE FRONT OF THE CENTRE AT GLEN  
BURNIE ADJACENT TO M&T BANK NEAR  
RITCHIE HWY. 5:30-9:30 PM EVERY  
FRIDAY NIGHT UNTIL NOV. 4**

Hey Cruisers,

Spring is finally here, The last few days have definitely been cruising weather. Our Friday night cruising will start April 1st, Hope to see you all there. Also our first spring Car Show/ Swap Meet/Flea Market will be April 9th at Gerst Farm. Please let your family and friends from other Car Clubs know the date and time.

I would like to welcome our new members and invite them to sign up and help with our upcoming shows as well as our current members. Help is needed all around.

Happy Spring,  
Rick 443-829-5658

Post 195 8-11am \$7.00

## OL' SPOT

A group of country friends from the Cottonwood Baptist Church wanted to get together on a regular basis, socialize, and play games. The lady of the house was to prepare the meal.

When it came time for Al and Janet to be the hosts, Janet wanted to outdo all the others. Janet decided to have mushroom-smothered steak. But mushrooms are expensive. She then told her husband, "No mushrooms. They are too high."

He said, "Why don't you go down in the pasture and pick some of those mushrooms? There are plenty in the creek bed."

She said, "No, some wild mushrooms are poison."

He said, "Well, I see varmints eating them and they're OK." So Janet decided to give it a try. She

picked a bunch, washed, sliced, and diced them for her smothered steak. Then she went out on the back porch and gave Ol' Spot (the yard dog) a double handful. Ol' Spot ate every bite. All morning long, Janet watched Ol' Spot and the wild mushrooms didn't seem to affect him, so she decided to use them. The meal was a great success, and Janet even hired a helper lady from town to help her serve. She had on a white apron and a fancy little cap on her head. After everyone had finished, they relaxed, socialized, and played 42 and dominoes. About then, the helper lady from town came in and whispered in Janet's ear.

She said, "Mrs. Williams, Ol' Spot just died."

Janet went into hysterics. After she finally calmed down, she called the doctor and told him what had happened.

The doctor said, "That's bad, but I think we can take care of it. I will call for an ambulance and I will be there as quick as possible. We'll give everyone enemas and we will pump out everyone's stomach. Everything will be fine. Just keep them calm."

Soon they could hear the siren as the ambulance was coming down the road. The EMTs and the doctor had their suitcases, syringes, and a stomach pump. One by one, they took each person into the bathroom, gave them an enema, and pumped out their stomach.

After the last one was finished, the doctor came out and said, "I think everything will be fine now." and he left.

They were all looking pretty weak sitting around the living room and about this time the helper lady came in and said, "You know, that fellow that ran over Ol' Spot never even stopped."

## Chaplains Corner

BY: Dick Smith

The American family is in a state of decline. The only way to uphold and strengthen Americas families is to recognize how crucial they are to the health and well-being of our nation as a whole and take responsibility to make our own families as healthy and whole as were able. Heaven knows it isn't easy.

Think of the nuclear family of Jesus, Mary and Joseph. Even this family had to chose a countercultural (culture opposed to prevailing cultures) lifestyle in order to fulfill its mission of holiness. Is there anyone who doesn't think divorce sounded like a reasonable option to poor Joseph whose decision to remain with Mary ultimately was made with the help of an Angel who appeared to him in a dream? The guy defined "counterculture."

In our day, too, a counterculture family is one that takes the hard road to preserve its foundations of love.

Here is a partial list of attributes of a "holy family"

- (1) Anticipating one another's needs.
- (2) Cherishing each other and not taking our families for granted.
- (3) Forgiving and respecting each other.
- (4) And resisting the temptations to gossip or hold our family members to a standard we ourselves can't keep.
- (5) Above all else, put God first in our families, and accept the essential truth that "The family that prays together, stays together"

All of these are simple habits we can adopt to foster the love and harmony that families are meant to embody. It's a short and powerful list, if you think about it. I pray that God builds a hedge of protection around your family, and that you'll enjoy all the health and love that family life can provide.

Thought for today: Wives should put pictures of missing husbands on beer cans.

CLUB MEMBERS TOM PATTAN, ANDREW JEFFRIES, RUSS & AMANDA RICHARDS, JANET & RICK WOOLRIDGE & MOLLIE BOYD ATTENDED THE ALL CLUB'S BREAKFAST MEETING PUT ON BY THE KENT ISLAND CRUISERS. AFTERWARDS WE WENT TO THE OUTLETS WHERE DIANE PATTAN MET UP WITH US AND THEN ONTO THE SUICIDE BRIDGE FOR DINNER

# HERSHEY CRUISE

The weather was great for our first Cruise of the year planned by Russ Richards. Along for the cruise to the Antique Car Museum and Chocolate World in Hershey, PA was Russ & Amanda Richards, John & Dina McKenny, Mary & Dick Cox, Dave & Linda Williams, Tom & Diane Pattan, Mollie Boyd, Ginny Woody, Jim Marion, Elmer & Nancy Couch, Bill & Bev Stallings, and Joe & Doris Bouchat.

*We rode the ride at Chocolate World and purchased lots of goodies. John & Dina, Mary & Diane made their own personal candy bar.*

### The Rules of Chocolate

1. If you get melted chocolate all over your hands, you're eating it too slowly.
2. Chocolate covered raisins, cherries, orange slices and strawberries all count as fruit, so eat as many as you want.
3. The problem: How to get two pounds of chocolate home from the store in a hot car.
4. The solution: Eat it in the parking lot.
5. Diet tip: Eat a chocolate bar before each meal.
6. It'll take the edge off your appetite and you'll eat less.
7. A nice box of chocolates can provide your total daily intake of calories in one place. Isn't that handy?
8. If you can't eat all your chocolate, it will keep in the freezer. But if you can't eat all your chocolate, what's wrong with you?
9. If calories are an issue, store your chocolate on top of the fridge. Calories are afraid of heights, and they will jump out of the chocolate to protect themselves.
10. Money talks. Chocolate sings.
11. Chocolate has many preservatives. Preservatives make you look younger.
12. Why is there no such organization as Chocoholics Anonymous?
13. Because no one wants to quit.
14. Put "eat chocolate" at the top of your list of things to do today. That way, at least you'll get one thing done.
15. Chocolate is a health food. Chocolate is derived from cacao beans. Bean = vegetable. Sugar is derived either from sugar beets or cane, both vegetables. And, of course, the milk/cream is dairy. So eat more chocolate to meet the dietary requirements for daily vegetable and dairy intake.

## STREET SURVIVOR'S PATRONS 2011

JIM & DONNA ANDERSON  
MARY & DICK COX  
CHARLIE EAKLE & BONNIE  
KEITH & LINDA HECKATHORN  
TOM & DIANE PATTAN  
RUSS & AMANDA RICHARDS  
GINNY WOODY IN MEMORY OF HOWARD  
JANET & RICK WOOLRIDGE  
A GREAT YEAR IN 2011!!

Our Memorial Day Show is coming up May 29th.

Chairmen, Tom & Diane Pattan and Russ & Amanda Richards would like to ask your help in making this yearly show a success.

We will need Baskets for our Raffle Table and once again we need to ask our very talented ladies to help us out.

We will need 30+ Door Prizes and we need everyone's help for that. They don't have to be large, under \$5.00 is fine.

As always we will need your help in setting up, working at the show and cleaning up.  
Please give us a hand.

Read this thru slowly and try to comprehend the amount of force produced in just under 4 seconds!

There are no rockets or airplanes built by any government in the world that can accelerate from a standing start as fast as a Top Fuel Dragster or Funny Car!

#### DEFINITION OF ACCELERATION

One top fuel dragster 500 cubic inch Hemi engine makes more horsepower than the first 4 rows of stock cars at the Daytona 500.

It takes just 15/100ths of a second for all 6,000+ horsepower of an NHRA Top Fuel dragster engine to reach the rear wheels.

Under full throttle, a dragster engine consumes 1-1/2 gallons of nitro methane per second; a fully loaded 747 consumes jet fuel at the same rate with 25% less energy being produced.

A stock Dodge Hemi V8 engine cannot produce enough power to drive the dragster's supercharger.

With 3,000 CFM of air being rammed in by the supercharger on overdrive, the fuel mixture is compressed into a near-solid form before ignition.

Cylinders run on the verge of hydraulic lock at full throttle.

At the stoichiometric (stoichiometry: methodology and technology by which quantities of reactants and products in chemical reactions are determined) 1.7:1 air/fuel mixture of nitro methane, the flame front temperature measures 7,050 deg F.

Nitro methane burns yellow... The spectacular white flame seen above the stacks at night is raw burning hydrogen, dissociated from atmospheric water vapor by the searing exhaust gases.

Dual magnetos supply 44 amps to each spark plug. This is the output of an arc welder in each cylinder.

Spark plug electrodes are totally consumed during a pass. After halfway, the engine is dieseling from compression, plus the glow of exhaust valves at 1,400 deg F. The engine can only be shut down by cutting the fuel flow.

If spark momentarily fails early in the run, unburned nitro builds up in the affected cylinders and then explodes with sufficient force to blow cylinder heads off the block in pieces or split the block in half.

In order to exceed 300 mph in 4.5 seconds, dragsters must accelerate an average of over 4Gs. In order to reach 200 mph (well before half-track), the launch acceleration approaches 8Gs.

Dragsters reach over 300 miles per hour before you have completed reading this sentence.

Top fuel engines turn approximately 540 revolutions from light to light! Including the burnout, the engine must only survive 900 revolutions under load.

The redline is actually quite high at 9,500 rpm.

Assuming all the equipment is paid off, the crew worked for free, and for once NOTHING BLOWS UP, each run costs an estimate \$1,000.00 per second.

The current top fuel dragster elapsed time record is 4.428 seconds for the quarter mile (11/12/06, Tony Schumacher, at Pomona, CA).

The top speed record is 336.15 mph as measured over the last 66' of the run (05/25/05 Tony Schumacher, at Hebron, OH).

Putting all of this into perspective:

You are driving the average \$140,000 Lingenfelter [twin-turbo] powered Corvette Z06. Over a mile up the road, a top fuel dragster is staged and ready to launch down a quarter mile strip as you pass. You have the advantage of a flying start. You run the [Vette hard up through the gears and blast across the starting line and pass the dragster at an honest 200 mph. The [tree] goes green for both of you at that moment.

The dragster launches and starts after you. You keep your foot down hard, but you hear an incredibly brutal whine that sears your eardrums and within 3 seconds, the dragster catches and passes you. He beats you to the finish line, a quarter mile away from where you just passed him.

Think about it, from a standing start, the dragster had spotted you 200 mph and not only caught, but nearly blasted you off the road when he passed you within a mere 1,320 foot long race course.

..... and that my friend, is ACCELERATION!
